

## **Press release from Mr. René Fell (outgoing President)**

Renens, 26<sup>th</sup> June 2020

### **New President and name change of the Association**

At its last general meeting on 26 June 2020, the General Assembly decided to elect Mr. Sergio Milesi, also CEO of GAS&COM ([www.gas-com.ch](http://www.gas-com.ch)), as its new Chairman. This company occupies a central position in the data center business, as it offers the interconnection of Swiss data centers in a completely sovereign and extremely secure manner.

Another important decision is that Vigiswiss will be changing its name and returning to its original roots, using the "Swiss Data Center Association" (or SDCA) as its spearhead. The association will gradually abandon its Vigiswiss brand, which is considered too abstract and has a somewhat pejorative connotation within the Swiss German-speaking community.

As outgoing President and on behalf of all SDCA members, I wish Sergio fully success in his new role as President of the Swiss Data Center Association (SDCA) and I am looking forward to seeing our association progress thanks to his new impulse!

René Fell
